

Firm Steel Structure

The black clamp-on pallet forks is made of grade 50 structural steel that is sturdy, durable, reliable, and safe. The black powder coat is anti-rust.

Wide Application

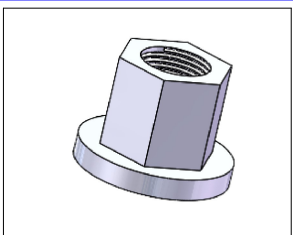

The pallet fork reaches a capacity of up to 2500lbs and it is widely used in heavy duty farm work. It is used to pick up lumber and firewood, moving fence posts and rearranging hay.

(The installation of five teeth and six teeth is the same, choose according to the size and requirements of the excavation teeth)

Quick-Attach and Easy to Install

The clamp-on pallet forks is quick-attach design. Just slide the fork over the cutting edge of the bucket and clamp it down to the lock. It is easy to install and remove.
