

INSTALLATION INSTRUCTIONS

Notes

Read this instruction carefully before starting installation.

Proper tools will improve the quality of installation and reduce the time required.

All mirrors are asymmetrical design for better view range.

For vehicles without factory heat and signal light functions require an additional wiring.

Power fold/Memory/Auto-Dimming functions are not available.

If missing parts or any damage found, please take a picture and contact us.

Reference the vehicle owner's manual to adjust the new mirrors.

Reuse the factory components if the factory mirrors equipped ambient sensor.

INSTALLATION INSTRUCTIONS

Step 1:

1. Open the front door to remove the upper extension triangular trim panel.
2. Remove (3) rubber plug beside triangular trim panel.
3. Remove cover under the door grab.
